Can you see any country in the solar system?  
As human beings, we think of our self, our home,  
our country, our continent...  
Lets not be myopic and think about ourselves.  
If we want universal development, then we must think  
and work on a much larger canvas.

4 Terrestrial planets : Earth, Mars, Mercury, Venus

2 Gas giant planets : Jupiter, Saturn

2 Ice giants : Neptune, Uranus

Pluto : Pluto is a dwarf planet.

A dwarf planet travels around, or orbits, the sun just like other planets. But it is much smaller. Clyde Tombaugh discovered Pluto in 1930.

Other dwarf planets

Small Bodies like comets

Other Solar Systems

So far, astronomers have found more than 500 solar systems and are discovering new ones every year. Given how many they have found in our own neighborhood of the Milky Way galaxy, scientists estimate that there may be tens of billions of solar systems in our galaxy, perhaps even as many as 100 billion.
